

Open plan office extension

## PROJECT

# Anglia Farmers Extension

### DESCRIPTION :

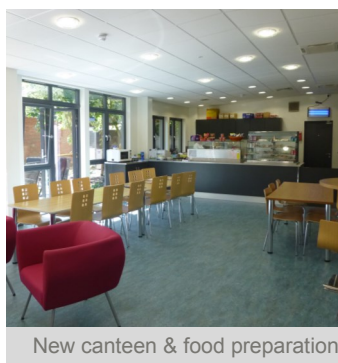

- Three years after moving into their new offices near Norwich, Anglia Farmers had outgrown the maximum capacity of 100 people in the main open trading centre.
- The extension accommodates about 80 additional desks and a relocated, enlarged canteen, including a new food preparation facility.
- The extension maintains the same form as the existing with a high central spine flanked by two lower lean-tos. The original open plan offices were so successful that the client requested more of the same.
- The extension is built on a tight site, bordered by the farmyard, existing buildings and a boundary wall. The link to the original office is via a wedge-shaped space, acting as a hinge between the two parts of the building.
- The extension added 660m<sup>2</sup> to the original 1,100m<sup>2</sup> and was completed in August 2012.
