

Low risk leaf preparation area

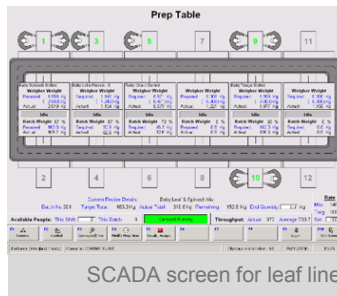

PROJECT

Bakkavör

Wingland Foods

DESCRIPTION :

- A dedicated leaf and deli salads factory for Waitrose.
- Arctica process staff designed the equipment and process layout.
- Fully specified with a contract value of circa £5m.
- The leaf line was designed to enable up to six differing leaf materials to be prepared and mixed as part of the wash process.
- This innovative design significantly reduces product damage and improves labour efficiency. It was the most advanced design in Europe when installed.

SCADA screen for leaf line

High care area

High care bagging area
